## **PRESS RELEASE**

### **QSystem Monitor from CCSS helps storm water pump manufacturer meet ISO 9001 and SOX standards**

*“One screen” dashboard monitors and displays*

*Gillingham, Kent, UK and Raleigh, North Carolina, July 18, 2005* – When ITT Flygt recently had to re-certify its ISO 9001 accreditations, QSystem Monitor from CCSS was an important tool for Eric Larmier, Director of Information Systems, Nanterre, France.

“The one-screen display dashboard is fully part of managing and controlling our iSeries infrastructure. As such, it is included in all of our ISO procedures and is part of our ongoing quality assurance” Larmier explains. “QSystem Monitor delivers indicators that show that the information systems infrastructure is mastered by the IT department.”

Likewise, he reports, QSystem Monitor helps the company meet Sarbanes-Oxley (SOX) standards: “SOX is similar to ISO 9001 in terms of managing the iSeries physical and logical security, as well as internal control. QSystem Monitor audits and documents activity 24x7 in three key areas: user systems access, system performance and accounting.”

Beyond its usefulness for ISO 9001 and SOX compliance, the CCSS solution has proven itself indispensable every day: “QSystem Monitor has become an essential tool for monitoring our iSeries systems and ensuring good performance levels for our end users, which is most important,” Larmier concludes.

#### **About ITT Flygt**

ITT Flygt is one of the companies in ITT Industries, Inc. ([www.itt.com](http://www.itt.com)), a global group that provides advanced technology products and services. Headquartered in White Plains, NY, the company generated \$6.8 billion in 2004 sales.

Municipal water collection systems around the world rely on pumps from ITT Flygt to prevent storm water from overflowing into lakes and rivers, and to later move the water through the wastewater treatment plant. In the U.S., more than 250 flood control pumping stations are equipped with huge submersible pumps from ITT Flygt. In New Orleans and Jefferson Parish, Louisiana -- an area prone to hurricane-related flooding -- ITT Industries has more than 50 vertical and horizontal pumps installed to combat flooding and move large volumes of water short distances. During Hurricane Georges, the vertical pumps removed 135,000 gallons per minute, while the horizontal pumps moved up to 500,000 gallons of water per minute.

## About CCSS

CCSS, an Advanced IBM Business Partner, develops systems software for the IBM eServer iSeries, and markets its solutions worldwide, both directly and through a network of agents.

The CCSS QSystems Management Suite includes:

- QMessage Monitor, which frees operation staff to focus on critical messages by automatically answering and tracking informational and non-urgent messages
- QSystem Monitor, which allows users to centrally manage their systems proactively by providing a real-time view
- QRemote Control, which delivers the power to manage the iSeries directly and securely from a mobile phone

All CCSS solutions are certified by IBM as Server Proven. In developing its innovative and functionally rich solutions, CCSS listens to customers and participates in several important IBM partnerships. CCSS belongs to the IBM iSeries Tools Network Program and the IBM Advanced Level Business Partner in Development and Solution Development groups.

CCSS customers include such high-profile firms as Volvo, Newell Rubbermaid, Mattel, and Royal Bank of Scotland International. The company is based in Gillingham, Kent, England, with regional headquarters in Bonn, Germany and Raleigh, North Carolina, USA.

For more information and white papers on how the QSystem Management Suite can be used for event management, systems availability, message management and Sarbanes-Oxley compliance, visit [www.ccssltd.com](http://www.ccssltd.com). Contact CCSS via email [info@ccssltd.com](mailto:info@ccssltd.com) or by telephone at +44 (0)1634 370444 in the UK (international) and at 919 573 6126 in the U.S.
