
PRESS RELEASE

CCSS QSystem Monitor and QMessage Monitor are shipping with IBM System i5/OS V5R4

Full versions included on "Try-And-Buy" CD

Gillingham, Kent, UK and Raleigh, North Carolina, February 15, 2006 – CCSS announces that its QSystem Monitor and QMessage Monitor solutions are included with today's new shipments of V5R4, the newest version of the IBM System i5 operating system. IBM introduced V5R4 to its users earlier this month, and began shipping it February 14th.

"With every shipment of V5R4, IBM is including a CD with full versions of selected software solutions from independent software vendors. We are pleased to announce that full versions of our QSystem Monitor and QMessage Monitor – ready to load and use -- are included in the i5/OS V5R4 disk set," says Ray Wright, CCSS Managing Director.

"Our software solutions help businesses get the most out of their IBM System i5," explains Wright. "QSystem Monitor and QMessage Monitor provide the ability to monitor multiple items on multiple systems. This empowers the administrator to easily monitor the system status from one screen, and to respond to system events."

"CCSS solutions were among the first to be chosen for IBM's "Try and Buy" program when V5R3 was released last year. We are pleased that our products are again being shipped with the latest version of the IBM System i5 operating system," Wright concludes.

About CCSS

CCSS, an Advanced IBM Business Partner, develops monitoring software for the IBM System i5 and markets its solutions worldwide, both directly and through a network of agents in Europe and North America.

The CCSS QSystems Management Suite includes:

- QSystem Monitor, which allows users to pro-actively manage their system performance by providing real-time monitoring and in-depth reporting
- QMessage Monitor, which frees operation staff to respond to critical messages by automatically answering and tracking informational and non-urgent messages

- QRemote Control, which delivers the power to manage the iSeries directly and securely from a mobile phone

In developing its innovative and functionally rich solutions, CCSS listens to customers and participates in several important IBM partnerships. CCSS belongs to the IBM iSeries Tools Network Program and the IBM Advanced Level Business Partner in Development and Solution Development groups. All CCSS solutions are certified by IBM as Server Proven and qualify for IBM's ServerProven rebate program. For more information, visit www.ccssltd.com.
