
PRESS RELEASE

CCSS Announces First Asian Partner: eXystus Technologies Philippines, Inc.

Raleigh, North Carolina and Gillingham, Kent, UK, June 21, 2006 – eXystus Technologies Philippines, Inc. has become the first Asian agent for CCSS, announces Paul Wright, CCSS International Account Manager. CCSS develops and markets the QSystem Management Suite of monitoring and messaging software for the IBM System i (formerly known as the iSeries and AS/400). eXystus Technologies Philippines, Inc., based in the capital Manila, provides integration and consulting services to System i users throughout the Philippines.

“We are delighted to announce our first Asian agent,” says Paul Wright. “eXystus is known for its high quality service and expertise. The QSystem Management Suite helps eXystus customers to fully utilize the power of their System i. Our user friendly and powerful monitoring and messaging software helps companies spot potential problems early on and resolve them immediately, often without operator intervention.”

“As an IBM ISV providing solutions for IBM System i users in the Philippines, eXystus Technologies Philippines, Inc. has a unique perspective on management of the System i,” says Edward Felicen E. Soro, Senior Manager, System i Solutions Division of eXystus Technologies Philippines, Inc.

“As IBM Technical Experts, we have helped clients design solutions to overcome their challenges. Yet we always felt that there should be a better way to get from point A to point B and ease the management burden. When we first viewed the QSystem Management suite, we agreed that this was the right solution for any size business to provide up-to-the-second management of their system,” Soro continues.

“Being System i consultants, we are not expert sales reps, however because of the simplicity and straightforward approach of the QSystem Management suite, it sells itself,” he concludes.

About eXystus Technologies Philippines, Inc.

eXystus was created to fill a void in the technical service offerings in Philippines. Its mission is to provide first-class consulting, technical and project management services to all levels of business. By providing fast response, informed expertise, and consistently high quality solutions, eXystus Technologies Philippines, Inc. generates satisfied repeat customers. About CCSS

CCSS, an Advanced IBM Business Partner, develops systems monitoring software for the IBM System i (formerly known as the IBM iSeries and AS/400) and markets its solutions worldwide, both directly and through a network of agents.

The CCSS QSystems Management Suite includes:

- QSystem Monitor, which allows users to pro-actively manage their system performance by providing real-time monitoring and in-depth reporting
- QMessage Monitor, which frees operation staff to respond to critical messages by automatically answering and tracking informational and non-urgent messages
- QRemote Control, which delivers the power to manage the iSeries directly and securely from a mobile phone

In developing its innovative and functionally rich solutions, CCSS listens to customers and participates in several important IBM partnerships. CCSS is an IBM Advanced Level Business Partner in Development and member of the Solution Development group. All CCSS solutions are certified by IBM as Server Proven and qualify for IBM's ServerProven rebate program. For more information, visit www.ccssltd.com.

CCSS customers include such high-profile firms as Volvo, Newell Rubbermaid, Mattel, and Royal Bank of Scotland International. The company is based in Gillingham, Kent, England, with regional headquarters in Bonn, Germany and Raleigh, North Carolina, USA.

For more information and for white papers on how the QSystem Management Suite can be used for event management, systems availability, message management and Sarbanes-Oxley compliance, visit www.ccssltd.com. Contact CCSS via email info@ccssltd.com or by telephone at +44 (0) 1634 370444 in the UK (international) and at +1 (919) 573-6126 in North America.
